EXPERIENCE

Tech Lead — Palladium Labs

Apr 2025 – Present

- Led a team of 10 engineers, owning sprint planning and technical decisions across the product roadmap.
- Mentored new engineers and established best practices, reducing ramp-up time for a fast-growing team.
- Collaborated with CTO on product decisions, translating business goals into technical execution.
- Spearheaded end-to-end delivery of Alpend Protocol, coordinating frontend, backend, and smart contract efforts; launched beta with \$150K TVL.
- Owned Canton Network validator operations on GCP, ensuring 99.9%+ uptime and leading incident response.

Fullstack Developer — Palladium Labs (formerly Rivera Money)

Dec 2023 – Mar 2025

- Built and deployed a self-custody staking DApp with Next.js frontend, Node.js backend, and Auth0, processing 10,000+ operations with 99.9% uptime.
- Operated Canton Network infrastructure on GCP with Docker, achieving 99.8% uptime and reducing incident response by 60% via automated alerts.
- Integrated Botanix mainnet using Ethers.js/wagmi.js, enabling multi-chain DeFi interactions for 5,000+ users.
- Implemented Redux state management and blockchain indexers processing 50K+ daily transactions, delivering real-time data (<200ms) for user features.
- Resolved validator package compatibility, enabling cross-ecosystem functionality for 3+ integrated protocols.
- Integrated multi-chain support for 5 networks using Ethers.js/web3.js, enabling seamless wallet connectivity for 10,000+ users.
- Redesigned crypto transaction flows with responsive UI, increasing user engagement by 25% and reducing API response times by 15% (1M+ requests).
- Automated database processes, reducing manual efforts by 30% (15 hours/week) and eliminating 95% of data update errors.
